

For Outstanding Service Awards:

My interest in serving on the Outstanding Service Awards stems from the positive experiences I previously experienced as a member of the College of Education service and scholarship committee and my desire to give back as a former university service award winner (Outstanding Advising and Student Services Awards, awarded February 2024). I am organized, responsive, and diligent in completing tasks and as a program director, find incredible joy in recognizing the many ways our faculty and staff support students, our community, and one another. I am lucky enough to see acts of excellence at both the undergraduate and graduate levels through my participation on the University Teacher Education Council, at the Graduate Program Directors meetings, and at various task force or open forum meetings. As a frequent nominator of others, I would love to give back to the university community even more so through serving on this committee. I appreciate your consideration!
