

I am self-nominating for the SCCJLS seat on Faculty Council. I am a new faculty member in the unit but have experience from other institutions where I've held academic posts that situate me as a good fit on this committee. I have had a variety of service experiences such as designing and analyzing a campus climate survey, serving on a faculty affairs committee, an outreach committee, search committees, scholarship committees, and an awards committees. I've held leadership roles including chairing a campus-wide faculty and research development committee, organizing student research fairs, serving on faculty senate, and serving as a coordinator for an academic department. Given these experiences, I am interested in engaging in governance and providing input on matters that impact CECI faculty and students.
