

I am interested in actively serving on the Libraries Advisory Committee for several reasons. I am an active user of the Curriculum Materials Library, and would like to ensure that the collection is updated and staffed for our education students' use, especially as a new education liaison librarian is being hired. I currently have a libraries grant to modify an Open Education Resources text for the EDI 631 course I teach. As a frequent EDI 693 instructor, I am vested in assisting graduate students with their library research. And lastly, my daughter is a librarian and I have been vicariously educated on the latest academic library trends and issues. I believe I can be an informed and invested representative on the Libraries Committee.
