

I have served on Graduate Council since September of 2023 and have experience in both the curriculum review and policy subcommittees. This past year I was elected to serve as chair of the policy subcommittee which includes membership on the executive council of GC. My advocacy on GC has been (and will be) for high quality graduate education, faculty voice in decision making, and efficient decision making (i.e. elimination of redundant processes and reviews). This service complements my teaching in educational leadership and scholarly focus on change theory and dynamics within organizations.
