

## **Jump into the West Michigan Watershed**

Middle and High School Science Teachers  
Link Hope College Watershed Research to your Classroom

**June 14-18, 2021**

Immersive training session in watershed data collection and data analysis techniques to relate your classrooms to the surrounding watershed. Classroom materials provided. For high school, additional information on how water quality data is used for watershed restoration policy decisions. Optional opportunity to co-teach the material within summer science camps July 6-10 and 20-24. Stipends provided for both experiences.

Contact [explore@hope.edu](mailto:explore@hope.edu) for further information and registration instructions.
