

MySuccessCheck is a short questionnaire for new GVSU undergraduate students, intended to provide an early indication of which students are at greatest risk for dropping out. The questionnaire is intentionally brief, and includes two types of items: a few items required to create an effective diagnostic scale identifying students’ risk of dropout; and other specific items that GVSU student-support staff indicated they would use in practical interventions with individual students expressing needs. Participating students who express need get immediate feedback with suggested resources to help them succeed, and staff members also review responses and contact some respondents with offers of assistance.

Participation Rate:

Students in their first GVSU semester were invited via email to participate and were also encouraged to do so by staff throughout the university.

	# Invited	Participants	Response Rate
Total	384	131	34%
FTIAC	62	24	39%
Transfer	322	107	33%
On-Campus Resident	112	51	46%
Off-Campus Resident	272	80	29%
Female	215	91	42%
First Generation	182	63	35%
Students of Color	110	31	28%

Risk Assessment and Staff Follow-up:

The MySuccessCheck interface for staff members includes a mechanism for staff members to post notes to individual students’ records. These notes allow staff members to coordinate responses, and also allow us to assess the completeness and effectiveness of the responses. Staff members categorize the intensity of each response using the following scale:

- One-way communication ... staff member sent an email or left a voicemail message, but didn’t receive any reciprocal communication.
- Limited communication ... staff member and student communicated reciprocally, but not in particular depth.
- Discussion ... staff member had a substantive exchange of information about the content of the student’s MySuccessCheck response.

Participants received some of the feedback messages automatically and immediately upon completion. We cannot measure how attentively participants read the feedback, or determine its effectiveness, but I’ve divided the participants who did not receive a logged contact from a staff member into two categories: those who requested an email copy of their automatic feedback and those who did not.

Altogether, staff logged 51 contacts affecting 34 different participants. Because staff responses are reactive to needs expressed in students’ responses, it is not expected that every student would elicit a response. A total of 34 participants chose to receive their feedback by email. Of those, 7 received a logged contact from a staff member.
