Lowell, MI 49331

PERSONAL STATEMENT

During the years I have taught at GVSU I have developed organizational and communication skills with students and clinical sites along with many teaching abilities. I am the first faculty member in the College of Health Professions to be promoted to senior affiliate faculty. With 15+ years of experience in family medicine with the underserved patient population I have grown my skills as a competent Physician Assistant. I have recently began working in a women's health clinic through Spectrum Health performing obstetrics and gynecological care to the rural community of Greenville. Throughout my clinical practice I have continued to precept students from multiple universities. However, I feel my greatest attribute to any office I work with is my positive attitude. I believe a positive attitude is contagious and improves the working environment from staff to patients or students.
