

Grand Valley State University

13th Annual
Accountability Report
2019-2020

Principles of Accountability

Grand Valley State University is an institution that produces graduates who are making a difference in Michigan and around the world. As a public university, it is accountable to the taxpayers of Michigan and to students who pay tuition and seek a path to a more fulfilling life. This annual Accountability Report provides proof of the university's performance in an easy-to-digest format for policymakers, business and community leaders and students. The data is clearly sourced and provides assurance of the results people expect from a state institution. The report clearly shows Grand Valley is excelling in key areas: quality of students, retention and employment upon graduation. It also shows the university's efficiency in operations.

The report's organization correlates to seven core values of the university:

Excellence – Integrity – Inquiry - Inclusiveness Community – Sustainability - Innovation

These values provide the framework for the work of the university within the communities it touches, and the work of the students and graduates who bring their talents into the businesses and organizations throughout the state and beyond. The positive impact they have is called the Laker Effect.

For more information on Grand Valley's values, plan and performance, visit:

The Future of Grand Valley

2016-2021 Strategic Plan

Key Outcomes:

- Learning environment is personal, challenging, transformational. Supports excellent academic programs and co-curricular opportunities.

Grand Valley:

- Is diverse and inclusive.
- Has mutually beneficial relationships, partnerships, collaborations, and connections in Michigan and around the world.
- Supports innovation, integrative scholarly and creative activity, and the use of new technologies.
- Strategically allocates its fiscal, human and other institutional resources.
