Bringing Life-saving **Breast Screening** to You!

At Trinity Health, we understand life gets busy, so we made getting your mammogram easier and less stressful.

Our mobile mammography unit uses the same state-of-the-art digital technology offered at our trusted Breast Center locations. You can count on our team of specially trained technologist and board-certified radiologist to deliver safe, accurate breast cancer screenings.

- Travels throughout the community to serve a variety of patients, including women who may not have access to mammograms
- Utilizes gold standard 3D digital technology
- Collects clear images and delivers timely, accurate results
- Focuses on your dignity and comfort at every step—after you register, you will use a private dressing room before receiving your mammogram

Cost isn't a barrier! Mammograms are considered preventive care and are usually covered by insurance. If uninsured, alternative programs are available.

Are you interested in having our mobile mammography unit visit your community?
Contact us at 855-559-7179 or THGRmobilemammography@trinity-health.org.
