Summary

PrepNet Virtual Academy was created to provide an additional educational choice for two primary student groups with different unmet needs: those currently enrolled in a National Heritage Academies partner school who desired a virtual option, and others across Michigan who are interested in a rigorous academic program of study in a virtual setting. The academy aims to be a desirable choice for families who are looking for unique ways to meet their child's educational needs. Students experience 6-8 classroom courses each semester, allowing them to have exposure to a diverse group of educators. Students also participate in advisory groups where they are able to increase their communication skills while setting academic goals.

Highlights

100% of the 2022 graduating class were accepted to at least one college or university.

Students had multiple opportunities to meet in person to participate in environmental science and robotics programming.

Students in grades 7-12 participated in the academy's first annual Career Day.

CSO Capacity Analysis

PrepNet Virtual Academy has demonstrated academic, organizational, and fiscal soundness. Only in its third year of operation, the CSO has observed that PrepNet Virtual Academy continues to effectively manage significant increases in student enrollment. This has been accomplished largely due to the experience, resources, and support by the school's management partner, National Heritage Academies. The CSO has observed that the academy's academic results was favorable compared to similar schools, however, the percentage of students participating in state testing was very low. This needs to be an area of focus for the school moving forward. The CSO has confidence in PrepNet Virtual Academy's capacity to grow and improve its academic results and community reach.
