## CSO Capacity Analysis

Cornerstone Health and Technology School (“CHTS”) has demonstrated fiscal stability during the term of its charter contract, but its academic performance has lagged behind that of statistically similar schools on the SAT. The CSO has observed that the school is well-attended and in demand by parents. Board leadership has transitioned and become more engaged and stable. Operationally, the school has experienced disruption in school leadership roles and its current leader also serves as the co-lead of Academics for the entire network. In coordination with other schools in its network, some transition has occurred in the grades offered at the school. However, the CSO has not yet received a plan for grade level configuration changes and, as such, is unclear on the board’s future vision for grades offered at the school. In total, the CSO believes that the school has some capacity to increase its academic performance, but the board’s vision and plan to increase this capacity is unclear.

## Summary

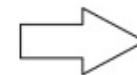

Cornerstone Health and Technology High School opened in 2012 and serves about 400 students in grades 10-12. Students primarily come from the other Cornerstone schools campuses. The school is strategically transitioning its high school to another campus and will offer lower grades within the next three years.
