CSO Capacity Analysis

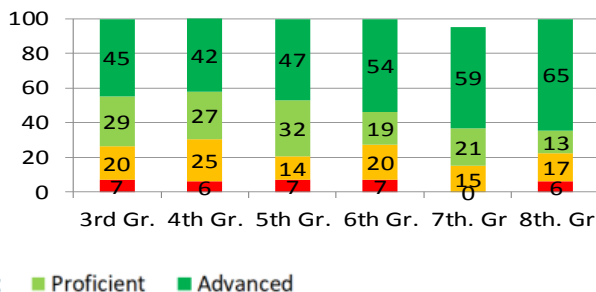

Achieve Charter Academy demonstrates strength in its educational program, organizational soundness, and fiscal stability. The school's academic performance significantly outperforms that of statistically similar schools. The CSO has observed a very stable educational environment, where many students enroll in kindergarten and stay through eighth grade. Because of the competitive school choice environment, the CSO believes that the school may wish to continue developing its academic program to both adapt to programmatic changes in surrounding schools and also to increase academic rigor to continuously challenge its higher-performing students. However, all evidence observed to date gives CSO confidence that the school's internal capacity to deliver strong academic results will remain solid.
