CSO Capacity Analysis

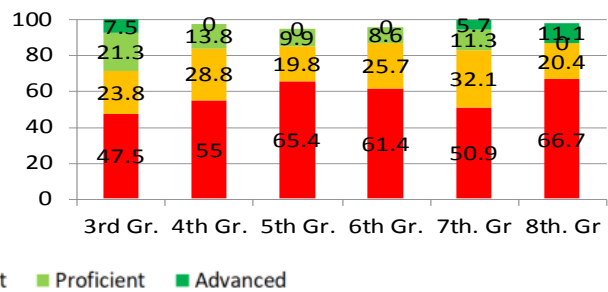

Reach Charter Academy has demonstrated its ability to remain organizationally and fiscally strong. Student proficiency on the state assessment relative to statistically similar schools is positive. The CSO has noted that K- 5 grade levels have lower teacher turnover, improved MSTEP scores and fewer discipline issues than other grade levels. The CSO believes that the school can strengthen its educational programs to increase student performance, and reports indicate that changes are in progress. For example, Math Expressions and Number Calendars will be implemented to help students develop and improve math critical thinking skills required by MSTEP. This, combined with Academy board monitoring of progress, provides the CSO with confidence that the school's management has both the desire and capacity to do so during the term of its subsequent charter contract.
